1080 HARDBACK™ CASE

> DIGITAL SURVIVAL.

There's work to do, and these days it takes a laptop to get it done. Which is why Pelican has built the Laptop Protection Line of cases. Six styles for just about any job and any size laptop, even 17" models.

Our legendary cases have been thrown from helicopters

and submerged in capsized vessels, with no damage to the important equipment they carry. But don't take our word for it. Visit our survival stories web page and see the incredible things that happen to Pelican Cases every day.

STRONGER BY DESIGN

The Pelican Protector™ Case uses an open cell core and solid wall construction, which is actually stronger and lighter than a solid core wall. Travel light with heavy protection. And you know it's a Pelican™ Case by the distinctive dual band top surface. Stainless steel pins are used for hinges

and handles. The new Double-Throw latches are smarter and easier to open: it's the classic 'C' clamp design with a secondary

movement that works like a pry bar to start the release and offers plenty of leverage to open with a light pull.

WATERTIGHT

The secret is the tongue-and-groove fit with Polymer o-ring acting as a waterproof seal. Also, the new

Automatic Pressure Equalization Valve releases built-up air pressure while keeping water molecules out, resulting in a watertight case that is even easier to open.

EXTRA PROTECTION

Pelican's Pick 'N' Pluck™ foam lets you customize the interior according to your gear. An easy, do-it-yourself system for custom-shaping the interior of the case according to your equipment. Layers of foam are pre-scored in tiny

cubes. Simply measure your equipment over the grid and pluck away. Contents stay in place and get extra protection at the same time.

For organizing supplies, check out our interior optional padded dividers and accessory holders. Individual compartments can hold important files, laptop, and laptop accessories.
